Detailed description of project						Type of services provided		
<p>In July 2017, the Government secured another long-term Loan from OFID to the tune of US\$ 14.3 million, in order to finance a Phase II of the VE Project. The project aims to supply those priority building, equipment and external works that were kept out from Phase I. This phase of the project supports the key education sector priorities including the National Development Plan (NDP II) and the Education Sector Strategies Plan (ESSP II), aiming the equitable access to BTNET and the promotion of national skills training for development and poverty eradication. Under Phase II the institutions will be made fully operational providing adequate equipment and training on the related equipment to the end-users.</p> <p>The overall objective of the consultancy services is to provide Skills & Institutional Management capacity upgrading for 8 technical institutions and outline the additional equipment required, develop specifications for identified equipment, control equipment installations, commissioning and user training. The main purpose is to guarantee that detailed technical description, tender action, contract execution and operationalization of TVET supplies for the eight institutions are set out in an efficient and economical manner.</p> <p>The equipment to be availed at Technical Institutes must be based on the student outcome of a particular programme or training course they wish to achieve. The required outcome or standard are determined by the labour market requirements, which are fed into qualifications, occupational standards and curricula. The available occupational standards and CBET curricula, should define the workshops and laboratories equipment requirements.</p> <p>To rationalise the above, a conceptual framework has been developed on how the activities will be organized and conducted.</p>						<p>Cadena is responsible for the Institutional management capacity building, which includes:</p> <ul style="list-style-type: none"> - Training preparation in the areas of: <ul style="list-style-type: none"> • Entrepreneurship, Strategy & Income Generation • Facilities Management & Maintenance • Management Information Systems (M&E) • Procurement Planning & Management • Staff Performance Management • Industrial Training Management - Training organization and implementation: <ul style="list-style-type: none"> • Selection of the beneficiaries and scheduling training sessions. • Online delivery of the institutional management capacity building, using video conferencing tools. - Hand-over: <ul style="list-style-type: none"> • preparation of short training report • evaluation of training sessions.
